

SOUTHERN CALIFORNIA
EDISON[®]

An EDISON INTERNATIONAL[®] Company

To whom it may concern

This is to acknowledge that Rupak Das satisfactorily performed the "Gas Calculations" Project. This project enables Southern California Edison's Catalina Gas Utility to reconfirm our "Continuous Safety Operations" for the community and ensure regulatory compliance. The safety calculations couldn't be done previously due to unavailability of technical expertise on staff at the Pebbly Beach Generation Station (PBGs). Rupak has been an asset in resolving challenges and fostering an environment of continuous improvement. We appreciate his contribution to Southern California Edison (SCE).

Sincerely,

 3/4/16
Jeff Lawrence

Sr. Project Manager

Catalina Operations

Southern California Edison
