To Whom It May Concern:

It's my pleasure to provide this letter of recommendation for Rupak Das. As Rupak's co-worker at Southern California Edison, I've worked closely with him over the past three years, sharing the same open office space the majority of the time. Not only has he been a key player on our project team, but he's also become a close personal friend. Rupak's skills and leadership qualities would make him an invaluable addition to your agency's project team.

Rupak has brought great value to Southern California Edison in Catalina by developing data management structures within Water, Gas and Power Generation through various projects assigned to him. Rupak performed the "Gas Safety Calculations" Project, which enables Southern California Edison's Catalina Gas Utility to continue safe operations and ensure regulatory compliance. The safety calculations couldn't be done previously due to unavailability of technical expertise at the Pebbly Beach Generation Station (PBGS).

Rupak has been an asset in resolving challenges and fostering an environment of continuous improvement. In addition, he performed critical projects like "Middle Ranch Reservoir Calculations", "SCADA" and "Water resources planning", which are critical tools for estimating available ground water in the Middle Ranch Reservoir and Catalina water aquifers. The tool, developed by Rupak, enables Edison to calculate the available Ground Water Storage instantly when the Fluid-Height is furnished. The calculations performed by him couldn't be completed previously without incurring the significant expense of procuring a technical subject matter expert. Rupak has been a great asset in continuously resolving challenges and fostering an environment of improvement.

Furthermore, Rupak has a very strong grasp of technology. He knows various software's inside and out and helps relay technical information to others in an accessible way. He explains new developments clearly and makes the most out of the resources available to him. Rupak makes the most of technology to find new prospects, provide modern solutions, and drive results.

Finally, In addition to measurable work achievements, Rupak's personality and work ethic are top notch. His resourcefulness and the ability to work in a team is what makes him a true professional. Rupak has strong group communication skills, which are very useful in his line of business.

In closing, I'd like to restate my strong support for Rupak Das. I'm confident that he will surpass your expectations in his new role. Rupak is driven, self-confident, proactively helpful, and experienced, and I know he will continue to find success. Please feel free to contact me at (818) 599-3786 or shadrezai@gmail.com with any other questions. Thank you for your time.

Sincerely

*Shad Rezai*
